

## Armory Scene Of Graduates' Smoker Sir Arthur Speaks

University Brass Band  
Entertained Audience  
With Songs

### BOXERS ON CARD

Sampson and Ewen Display  
Prowess Before An  
Audience Of 500

"A university should train its men and women to deal with abstractions and to apply these to the solving of problems of our social adjustments," said Sir Arthur Currie last night at the Graduates Reunion Smoker. This was the first of a series of major events to take place during the course of the next few days. A varied program was offered for the entertainment of the 500 guests present.

The McGill University Brass Band was present, and played a variety of stirring songs. The evening commenced with a series of boxing bouts between undergraduates and members of the Black Watch. The first was merely an exhibition bout in which Bert Light and George Smith fared equally. The second one was of short duration in which Ewen, of McGill, defeated Blackhurst, of the Black Watch. In the third bout, Sam Fyvie, who entered the ring with an injured rib, put up stiff opposition against Rogers.

**Light Entertainment**  
The next bit of entertainment was provided by Verona and Thorpe; the former played the piano and accordion, and sang, assisted by Thorpe. This was followed by a boxing bout between John Conlin and Paul Sampson; the former won the decision after a close battle, which was given by Frank Saxon and Mike Demetre next staged a comic wrestling bout, which was a humorous representation of the grapple game. Jimmie Rice related a few stories and then refreshments were served.

In his speech, Sir Arthur stated: "It is a challenging and alluring opportunity to which graduates are today called to pledge themselves. The past is always important as bearing upon the present, and the present is important for the light it may shed on the future. The work of the university is always fundamentally for the benefit of a tomorrow about whose circumstances and events we can never adequately know. A university like McGill must always be as one who dwells upon the mountain." (Continued on Page Four)

## New Wing To Be Opened In R.V.C.

Women's Quarters Enlarged  
And Improved By Change

Today marks one of the most important steps in the development of McGill, in the opening of the new wing of R.V.C. This comes as a remedy for a long felt want as there has always been a far greater number of applicants for residence than could be possibly accommodated.

There is room for from 70 to 75 students. Sixty study bedrooms have been provided, to the furnishing of which much thought and care has been given. In addition to these rooms there are, on the ground floor, several reception rooms for the staff and students, a suite of rooms for the warden, and other facilities.

The provision of reception rooms in the new building has made changes possible in the old building. A system of house telephones has been installed which serve the new rooms from a central switchboard. There are on each dormitory floor two sitting rooms, while on the landings between the floors are small rooms fitted up as laundries and kitchenettes.

The opening is to be quite informal and tea will be served later for the guests. The guests of honour are Miss Oakley, the first warden of R.V.C., and Professor Derrick a former member of the department.

The ceremony is being staged as part of the Graduate Reunion and a large crowd is expected to be present. The opening of this addition to the thirty-three year old Royal Victoria College is billed to commence at four o'clock this afternoon.

### Daily Appears Tomorrow

The Daily will appear tomorrow, Friday, as usual though all lectures are cancelled. Reporters of Thursday and Friday nights' staffs will report for work at the usual time on their respective days.

## Registration For Reunion Functions Shows Enthusiasm

Graduates from far and near, and representing classes from 1880 to 1930, today thronged the Mount Royal Hotel for registration for McGill's third quinquennial reunion.

By closing time last night over 700 names were entered, and though the 1936 figure of over 2000 will scarcely be reached, nevertheless the total will be substantially swelled by today's registration.

Approximately one third of those registering are from Montreal, the remainder coming from widely scattered points. The honour of having come the farthest to participate in the celebrations belongs to Frank L. Horsfall, M.D., of the '03 class, who hails from Seattle, Washington.

## Form Committee To Advise Frosh

Students Council Also Appoints Editor of Annual

Saul Hayes, Law 3, was appointed Editor-in-Chief of the McGill Annual for 1932 at the meeting of the Students' Council held last evening in the Union. The formation of a committee to direct the attention of Freshmen to duties and activities in which they should interest themselves and the consideration of various society budgets in the light of the expected reduced revenue to the Students' Society for the coming session also occupied the attention of the Council.

The problem of Freshman initiation was gone into exhaustively, and it was felt that while attempts at physical discipline would be unwise, at the same time some effort should be made to impress upon the newcomers just what is expected of them in the way of ushering duties at the Stadium, participation in activities and general demeanour. Accordingly a committee composed of Margaret Dadds, Gordon King, Doug Hamilton and Glib Craig, with the power to add to their number from the Freshman class executives was appointed to direct the attention of the Freshman body to duties and activities.

**Propose Economics**  
It is estimated that revenue from student fees will be down from \$1800 to \$2,000 this year. An economy committee has been appointed to go in to the matter of expenditure at student social affairs. A survey of hotels, restaurants and other places made use of by students in the course of banquets and dances will be made with the attention of collecting data which should be of value to class executives and those of other Campus groups contemplating some social function. Approval of the Social Functions Committee of the University will not be given to any event which has not already received the approval of this economy committee. With a view to reducing the strain on the student pocketbook the Alma Mater dance for (Continued on Page Four)

## Dental Undergrads Hear Dean Walsh

Large Turnout Of Students  
Attend Initial Gathering

The importance of playing the game and conscientiousness in study and social activity was stressed by Dr. Walsh, the Dean of Dentistry in an address delivered to the meeting of the Undergraduate Society of the Faculty of Dentistry last night. The Dean also intimated that he would give hearty endorsement to the undergrads' activities and functions. Other addresses were given by Dr. Henry and Dr. Oliver.

This was the initial meeting of the Undergrads and Johnnie Lowe, their president, explained that the purpose of the meeting last night was to get the students together and to introduce the freshmen to the Faculty. It was decided that an informal banquet would be held near the end of this month in order to strengthen the bonds of friendship within the Faculty. Rues Ward was appointed the chairman of the Banquet Committee and will carry on the work with the aid of strong support from the other members of the Society.

It was suggested that the Undergrads hold periodical meetings to keep in close contact with each other and another important item arose inasmuch as some thought that case reports should be issued.

Although tomorrow's Daily is to be the Graduates' Issue, tonight's staff must report as usual at one o'clock for their assignments.

## Stabilizing Power Of Gold Standard Seen In Lecture

Dr. Day Outlines System To  
Steady Value Of  
Money

### SITUATION UNIQUE

Former Use Of Bank Rates  
Not Effective Today  
In Finance

Outlining the processes of the gold standard system, its pre-war success, and its modern failure, Dr. J. P. Day, associate professor of economics at McGill, commenced the first of a series of four lectures yesterday in the Bell Telephone Assembly Hall. Col. Bovey was in the chair.

In the place of barter the use of cash was invented early in history, and was one of the greatest inventions of all time, as cash is the root of all industrial progress. In time people came to use paper which had a definite gold backing. A paper note represented a certain amount of gold in a certain place.

#### Confidence Grows

As confidence grew a note though representing gold, only was backed by a small gold reserve. Nevertheless people could always get gold for their note. A gold standard was always giving confidence to the people in paper money as a substitute for cash.

Dr. Day stated that the essential duty of the gold standard was to guarantee that the currency of country would not be managed any worse than that of any other country or any better. This management of a currency is to ensure that a stable purchasing power is maintained for a country's monetary unit.

#### Standard to Stabilize

Sir Josiah Stamp, who was recently in this country, and is spoken of as the next governor of the Bank of England has said, "The most dangerous harm to prosperity comes from the shifting value of currency." The speaker pointed out that before the war, the gold standard was the principle stabilizing force.

When two countries were in equilibrium, there were three factors working. Each country had an equal proportion of gold; each had an equal proportion of imports and exports, and each had an even price level. Before the war if anyone of these levels were changed something would happen. (Continued on Page Two)

## Says Engineering Needs More Room

Prof. Brown Speaks At  
Electrical Club Lunch

"McGill University is in distinct need to house the departments of Geology, Mining, and Metallurgy," said Professor Ernest Brown, M.Sc., dean of the faculty of engineering, to the weekly luncheon meeting of the Electrical Club of Montreal in his address, "McGill University and Its Graduates," at the Queen's Hotel yesterday.

With reference to this faculty, Dean Brown said in part: "Additional equipment is needed in the electrical laboratories for the study of high tension problems; increased annual grants, by which existing equipment can be modified, or new equipment purchased to keep present laboratories up-to-date; too, are most desirable."

Speaking of the professors that have made the Faculty of Engineering at McGill renowned throughout the globe, Prof. Brown remarked that too often, teachers, both in school and college are so encumbered with the routine of administration that the time needed to discover for themselves, to transmit new ideas and suggestions to others, to make things more general and more comprehensive is sadly lacking.

In a discussion of the advancement in engineering knowledge at McGill University, Dean Brown said that it was but right to refer to Sir William Macdonald, who gave to McGill University some 13 million dollars. He built laboratories, endowed professorships, purchased and donated the estate on which the stadium stands, built and equipped the agricultural and teachers college at Ste. Anne de Bellevue, enabling the university to advance under the strong guidance of the late principal, Sir William Macdonald.

## Union Committee To Hold Informal On Friday Night

FOLLOWING the usual custom of the Union House Committee, an informal dance is to be held in the Union Ballroom. Organization of the dance is being done by Gordon King, President of the Union.

The dance is planned as a finish to the sports day and commences at 9.30 p.m. The charge for admission is \$1.25 and the cafeteria will be open for those desiring refreshments. As usual a good orchestra will be engaged for the affair, though the name has not been announced but it is expected that it will be one of the campus bands. Other entertainment is also being arranged for.

Better facilities for the informal are available this year, as the ballroom floor has been resurfaced and the whole Union made more congenial. The Union Committee has extended a cordial welcome to all and especially to the graduates taking part in the Reunion.

## "Made In Canada" Campaign Scored

House Of Commons Club  
Holds First Meeting

### TWO PAPERS GIVEN

M. Gowans and M. Grant  
Oppose On Question Of  
Canadian Trade

"The world nowadays is so inter-related that we cannot hope to muddle along alone," stated Margaret Grant in opposing Marjorie Gowans on the question of buying "Made in Canada" goods, at the first regular meeting of the House of Commons Club in R.V.C. last night. Animated discussion followed, with Rose Zahanian presiding.

Majorie Gowans in the first paper of the evening supported the campaign for "Made in Canada" buying on the principle that "Charity begins at home." Prosperity is developed by the rapid circulation of goods and money, which is best accomplished by trade with your nearest neighbour, she said. The idea of world trade is to supply one's own people with everything and export the surplus, and that only in exchange for imports with which Canada cannot supply herself.

#### People Thoughtless

"I am not advocating buying Canadian goods just for the sake of the name," concluded Majorie Gowans. "I don't believe in a Canadian monopoly along the lines of the old colonial (Continued on Page Four)

## Graduate Events

9 a.m. to 1 p.m. M. A. C. College open to receive visitors.

10 a.m. to 12:30 p.m. Faculty Building. Li-braries and Museum open.

12:30 p.m. to 2:30 p.m. McGill Table d'Hôte Luncheon, Plaza, Mount Royal Hotel.

Afternoon Golf at Marlborough Royal Montreal and Beaconsfield Clubs.

4 p.m. to 6 p.m. At Royal Victoria College, the New Wing will be formally opened, followed by Reception and Tea for alumni and alumnae.

9:30 p.m. Reunion Dance, Ball Room Mount Royal Hotel.

## Predicts Growth Of Royal Victoria College In Future

Miss Slack Makes Forecast  
Before Alumnae Society  
Last Night

### PRESENT FARCE

Play Produced By Students  
Of English Department  
On Moyse Hall Stage

At a special meeting of the McGill Alumnae Society, held last evening in Moyse Hall, Miss Z. Slack, President of the Society extended a hearty welcome to all functions of the reunion and spoke of the first Warden of R. V. C. of whom it has been said, "She set the very high ideals which students of the R. V. C. have been trying to live up to ever since. The two-headed goddess Janus who is able to look back into the past as well as forward into the future sees the result of co-operative enterprise on the part of woman graduates who have not been content to lose touch with their university—Alumnae work during the war, hospital libraries, and the success of the University Settlement Project.

Miss Slack reminded the Society that today they would pass another milestone upon the road of education of women at McGill who have not been content merely to meet once a month, drink tea, and listen to a speaker, and presented a challenge to the members of the Alumnae society saying that there is too little done for the Undergraduate. It is not enough to get the graduate coming out, it is necessary to get the freshman coming in. Miss Slack visualized R. V. C. buildings which would extend up University Street to the High School and would include a large gym, a cafeteria, and a women's Union.

Miss King who has been associated with Miss Hurlbatt in past years and is a past president of the Alumnae Society presented a photograph of Miss Hurlbatt to the R. V. C. and said "truly we need no photograph of Miss Hurlbatt to keep her vividly in mind. There will always be something of her spirit there." Miss Vaughan received the photograph on behalf of the college and said that Miss Hurlbatt had continued her tradition. Mrs. Vaughan believes that "Canadians should not necessarily govern Canadian institutions but that an exchange is necessary in order to set up a family within the British nation."

A one act farce was presented by students of the English department under the direction of Leona Gray. The cast was as follows:

The Bridegroom—Jacques Herdt.  
The Bride—Isobel Hasley.  
The Best Man—Bob Campbell.  
Ted—Malbourne Dolg.  
Aunt—Julia Rita Macdonald.  
Mrs. Tisdale—Grace Gillson.  
Mr. Grayson—Wm. Slatkoff.

## Initial Dance Held By Newman Club

Congress Hall Scene Of  
Great Hilarity

The Newman Club has established a record of numerous social activities and last night's dance was considered by the executive as being up to standard. The proverbial "ice-breaker" was scheduled to begin at 8:30 in Congress Hall, and within an hour more than a hundred guests had assembled. Denis Colclan took the tickets, while Katherine Hingston acted as hostess to ensure a welcome to all newcomers. This proved a great aid to the more timid guests who hesitated to approach unknown ladies. It was not long before the informality and friendly spirit exercised by the entertainers was caught by the entire company, and in a short time all were on happy terms.

Jim Mulally and his orchestra provided music that more than satisfied the expectations of the dancers. Due to the reduced price of admission the decorations were limited, but the supper, which was abundant and tastefully served, quite made up for any slight disappointment as to elaborate decorating. The dance ended at a late hour having fulfilled its dual purpose, namely of "breaking the ice" and of welcoming to a new season of activity the Club's members and friends.

## E. A. Forsey To Speak

Members of the Young People's Labour League will be addressed Sunday at 3 p.m. by Professor E. A. Forsey of the Department of Economics. He will speak on conditions in England at the meeting, which will be held at 4435 St. Lawrence Boulevard.

## Distinguished Canadians Recipients Of Degrees At Special Convocation

Premier Bennett And Three Graduates Honoured By University With Degree Of LL.D. — Tablet Unveiled In Memory Of Dr. Thornton, late Dean of Dentistry — Scarlet Key and Large Body of Students Form Escorts For Guests and Snake-Dance Through Streets to Loew's Theatre.

"CANADA is more powerful today than ever before, with greater ascertained resources and with an economic structure that has withstood the test of adversity," stated the Right Honorable R. B. Bennett in delivering his address at the special Convocation conducted at Loew's Theatre yesterday morning in connection with the third Quinquennial reunion of McGill graduates. The special convocation was for the conferring of honorary degree of Doctor of Laws upon Premier Bennett and three other outstanding Canadians.

The Convocation was preceded by a procession which wended its way from the Arts building, through the campus, along Sherbrooke, and hence to Loew's Theatre. It was led by the Principal and his four guests and preceded by the band, the Scarlet Key members and the students, the latter performing a snake-dance, to the enjoyment of the spectators who lined the sidewalks.

## S.C.A. Entertains Graduate Members

Dr. Tees Recalls Older Days  
Of Association

### ANGLIN CHAIRMAN

Over Fifty Present To Hear  
Addresses At Strathcona  
Hall Banquet

The banquet held last night at Strathcona Hall was attended by over 60 graduates. Many of those present had at one time been prominent in the affairs of the Student Christian Association. The dining hall was hung with red and white streamers, and the lights were shaded with red paper. All this cast a soft glow over the room in which old friends and acquaintances gathered to discuss intimate events and reminisce on days gone by.

The function was presided over by J. P. Anglin, who talked on the Rev. Mr. Jones to address the opening prayer. Among the other distinguished guests were: C. M. Stewart, secretary of the S.C.A.; Dr. Shaw, Professor Cooke; Dr. W. MacLeod, Murray Brooks, general secretary S.C.M.; Dr. Fred Tees; Dr. F. D. Adams, former dean of applied science, Charlie Hale, Jack Duckworth, Hugh Trimmingham, and Judge Howard.

**Graduates Sing Songs**  
Bob Picard called on the graduates to sing old familiar songs. The men sang with great enthusiasm those old favorites, "Put On Your Red and White Sweater," "About A Million Years Ago," and "Alouette." The graduates were then welcomed to the Association by C. M. Stewart, and invited to visit it more often. He paid a tribute to the founders of the organization, who built so well, and concluded with the hope that the (Continued on Page Two)

**Parade To Mark  
Saturday's Game**

Participants Will Have  
Choice Of Seats

According to a long-established custom, a parade will be held of the students attending the McGill-Varsity game on Saturday. It will consist of men and women, and will be headed by the cheer leaders and the band. It will start from the Union at 1:45 p.m., and will proceed to the Stadium where the entire Rooter's section will be reserved for them. Students not parading will have to wait until all participants are seated before taking their places.

The parade will be led by the band and the cheerleaders, and will be the prelude to the rooting to be done during the game. "Shag" Shagheensy asks a full turnout of rooters for today's Senior-Freshman game at the Stadium. The cheerleaders will be there, and play starts at 4:30.

**Attention R.V.C.**  
Hand in your time-tables at once to the Physical Education Department. Classes in physical education are to be drawn up immediately, and all classes will begin on November 2. Volleyball classes have been formed this year.

Those honoured by McGill at the Convocation were the Right Honorable Richard Bedford Bennett, K.C., M.P., Prime Minister of Canada, who was introduced by Sir Arthur Currie, Francis W. MacLennan, N.A.Sc. (Electrical) 1898; B.Sc. (Mining) 1900; General Manager of the Miami (Arizona) Copper Company, who was presented by Dean E. Brown, Honorable Alexander Cameron Rutherford, K.C., B.A., B.C.L., Chancellor of the University of Alberta, who was introduced by Dean Ira McKay, and William Harvey Smith, M.D., C.M. 1897; Emeritus Professor of Ophthalmology, University of Manitoba; Ex-President of the British Medical Association, who was presented by Dean Chas. F. Martin.

**Key Men Escort Premier**  
A colorful scene met the eyes of the early passers-by on McGill Campus and adjacent streets shortly after nine o'clock yesterday morning when the Convocation procession, led by the McGill band and Scarlet Key members, suitably attired in red and white and acting as guard of honor, assembled on McTavish Street at the head of a large contingent of undergraduates in front of the residence of Principal Currie. Escorting the Principal and his guest, the Rt. Hon. R. B. Bennett, to the Arts Building, the party were joined by the three distinguished McGill graduates who were to become the recipients of honorary degrees.

The procession restarted with the guard of honor leading the way, followed by the student body, alumni, faculty, and the band. (Continued on Page Four)

## Will Hold Annual Conversat Tonight

Dinner Features Evening At  
Strathcona Hall

An annual feature of the Student Christian Association is the Conversat and the Freshman Dinner which take place tonight at Strathcona Hall. The dinner is starting at six o'clock and the Conversat at 8:30.

The dinner is intended so that freshmen may gain acquaintance among each other and with the upperclassmen, some of whom will be present. Alex Edmison is expected and the speaker of the evening is Prof. T. W. L. McDermott, of the History department, who will talk on University Education.

The conversat is as usual. The program is the same as at a dance except that the freshmen takes during his ten minutes to the freshettes and tries to make her acquaintance. The price of admission which includes refreshments is 25c for the freshmen and 50c for the upperclassmen who may wish to go. This latter price is because the conversat is originally intended for the freshman class and not those of upper years. Any man may ask any girl for a conversat, of which there are about twelve, and is expected to break the ice during that time.

When a guest enters the hall he or her is given a ticket on which is affixed the name. Then the engagements are made. A bell rings and the first conversat commences and goes on for ten minutes, when another bell rings. There is a five minute intermission after which the same procedure is repeated.

The whole building is thrown open for the use of the talkers except for the rooms of the boarders at the Hall. Management is in the hands of Hugh Trimmingham, president of the Association.

## The Graduates' Number

We are pleased to announce that tomorrow's (Friday's) issue of the Daily will be in the hands of graduates who at one time toiled in the Daily galleys.

To these men who have so generously offered their time and effort is due much of the credit for the position which this paper now occupies. Tomorrow's paper should be of interest to the undergraduates as a memento of times older than theirs, it should be of greater interest to the graduates who were contemporaries of these men.

## More Haste . . .

If we are to believe those who talk of the "good old days" there was a time when people, even university students, took their time over their work, and when that rush and bustle, which is considered so characteristic of the twentieth century, was considered more or less a sign of lunacy. Whatever the disadvantages of such methods, whatever the superiority of the modern high-pressure activity over such leisurely progress, there is one way in which the old-fashioned worker was more efficient than his successor. He could not have been as careless.

In the haste which the modern worker—whether he be college student, professional man, artisan, or even plumber—shows in getting his work done it is inevitable that some errors must be made. Unfortunately, these errors are not always as negligible as they might be, not infrequently being of importance. They can hardly be avoided when the work is done in haste, and their elimination depends on the elimination of the factors which force the worker to labour under high pressure.

For the student who hurries to finish an assignment which must be in for a certain time we have nothing but sympathy; to advise him to plan his work better would be foolish, such things have a habit of getting behind schedule, despite plans, timetables and all such impedimenta. But for him who has just fallen into the habit of rushing, without any special aim, may we point out that in most cases there is very little advantage in saving the odd fifteen minutes here and there, especially when it is at the expense of the work. Few of us have sufficient to do in the time saved to warrant the trouble, and in most cases the extra time is spent wondering what to do with it. Perhaps it really is better to have the satisfaction of doing the work well.

## The Union

In 1906 the McGill Union was founded as a club open to all McGill men. Since that time it has been the centre of student life and the very hub of the extra-curricular activities of this University.

The Union provides all the advantages and privileges of club membership. All are there, the restaurant, tuck shop, billiard rooms, reading room, banquet halls and ballroom. The offices of most of the student societies and publications are located there.

It is strange then, that the Union is not utilized to as great an extent as it might by the student body. The story is told of a man in fifth year Medicine whose only entrance to the Union was in his last year at college to get his Annual. This is, of course, unusual, but there are a large number of students who seldom put in an appearance at the Union, much less make it a habit.

The Union was at one time more highly patronized than at present. Dances which were once held there have been moved down town to more expensive quarters. The banquet hall is not used to anything like its capacity. The cafeteria too is not drawing as well as it merits. We urge that students take greater advantage of that which they possess and which, moreover they pay for. The Union should not be neglected.

## CONVOCATION ADDRESS

By R. B. Bennett, LL.D. (McGill)  
Prime Minister of the Dominion of Canada

"MY first words must be words of gratitude for the honor that has just been conferred upon me. He would be a dull man indeed, who did not sincerely appreciate such an honor coming from a great university celebrating the 110th anniversary of its foundation. And my pleasure is heightened by the fact that I find myself associated in this honor with those whom I have long known. My old friend Dr. Rutherford, differing though we have in political matters for many years, has been my close and intimate friend for nearly 30 years, and I count myself most fortunate in being here today to receive this degree at the hands of your chancellor, whom I have known since we were youths together, although I am somewhat older than he, I hasten to assure you."

"I have not come this morning to sing the praises of McGill for the praises that I might give could add but nothing to the words of its great achievement. Nor am I here to discuss the high standard of its scholarship, for that has long been manifest and a bright spot in Canada's educational firmament. We all acknowledge McGill's outstanding position and readily support your claim to a place high among the universities of the world.

And we do more. We rejoice with you in the continued possession of those ideals which sustained you in the beginning and strengthened you to meet the vicissitudes of long years and now give an ever clearer meaning and purpose to your activities of today. They are incorporated in the structure of your university. They are the main-spring of your strength and they have grown into your tradition which lives on amongst your professors, students and graduates each and one and all. It is the bond which unites them to one another and to their country.

"THIS is the tradition of liberal education. It is sympathetic to the changing needs of our fast changing community. A tradition of youth and vigor. A tradition which holds constantly before you the common desire and the common obligation to practice in every walk of life the lessons here learned; of the value of discipline of mind and body, of the power of co-operation, of the triumph that waits upon the honest efforts of those who advance themselves so that they may the more surely succeed in the service of their country. This is your tradition. In effect, it is the tradition of all universities throughout our land. You are united to maintain it and certain, through its common possession, to remain one of the great forces which are building this country into a power among the nations of the world."

"THE universities of Canada have had a great opportunity and they have grasped it. From the beginning, they had a great mission and they have not failed it. Today, when the opportunity is greater than ever, when the task is still more difficult, we know they will again succeed. When the need for national unity was never more urgent, when the benefits from it were never so apparent, we believe that the universities are the links in a chain which binds our united forces, indivisible and mighty, so that the influences of adversity cannot prevail against our united efforts for the welfare and prosperity of our country.

I address you as citizens of Canada, as men and women, boys and girls on whom awaits a great opportunity for national service, if you will seize it. I know full well you know the conditions in your country and how you may help to better them. Although the misfortune of the times may have passed you by, you are not unaware of the misfortune that many others have experienced; of the problems that we have to face."

"CANADA has suffered and is suffering. When I say that other nations have suffered more than we, that our troubles though great, are less than those of others, I do not suggest that you should be content with present conditions. I tell you that so that you may be the more encouraged to work harder to terminate them. We will never be content until we have achieved that prosperity that is our birthright. Nothing is to be gained by shutting our eyes to the facts, and the facts that are against us are these:

This year there was a partial crop failure in some sections of the country of the wheat crop in a section of Canada, which has resulted in hardship not only to that section. Every section has suffered as a consequence of this major calamity.

"BEFORE that time, world trade had fallen. The purchasing power of many nations had diminished. Canada was obliged to acknowledge these facts and to reconcile herself to a corresponding diminution in her exports.

Since then, world conditions have grown more acute. Money values have followed the decline of commodity values. Depression has succeeded anxiety until even wise men, worn by long days of stress, confuse the substance, which is bad enough, with the shadow which is infinitely worse.

These are the facts. The basic facts underlying the primary movement which threw world trade and commerce out of gear. It is perhaps useless now to consider. We are concerned alone with the remedy.

"THE first thing to do is to take stock of ourselves. Wherein have we failed? Have we been too prodigal and reckless? It is true that in the pre-war days and in the post-war days of seeming prosperity we embarked on a program of national expenditures which today seem in part unwarranted. That mistake we are trying to remedy and today we must not hesitate to abandon commitments made in those times which today we find are not compatible with our position, and which offer no definite assurance that they will be a sure and certain means of improving it. Just as we must see that our production is kept in due and proper proportion to our actual capacity for consumption and distribution.

It is also true that a period of prosperity disturbed our views, and filled many of our people, including numbers of our young people, with the thought that the likeliest way to get rich was to let the stock market work for them, without doing any work themselves. I hope that we have now got away from the idea that any riches can be

gained and kept unless they are paid for by honest effort."

"THESE are our sins of commission, and they are serious ones. With our sins of omission I have already dealt before another tribunal. That is the gloomy side of the picture.

Let us now look at the brighter side and compare ourselves with what we were in the days of our prosperity and see wherein lies the change which justifies our changed circumstances. Our industries have grown in productivity and solidity. Our banks have been impregnable bulwarks against panic and the dislocation of business. Investigations continue to disclose the unparalleled richness of our natural resources. Thrift and economy are no longer precepts to be scoffed at, but guiding rules of our daily life. We have learned patience and fortitude."

"TRIBULATION has brought us closer together.

We have changed indeed, but for the better. Canada is more powerful today than ever before, with greater ascertained resources and with an economic structure that has withstood the test of adversity. Why, then, shall we not go forward once again? The world's troubles may not be over, but ours will be the sooner over, the sooner we learn fearlessness to meet them. I decry recklessness. I counsel caution. But I condemn the timidity and fear engendered by fears that have no place in the clear, straightforward minds of Canadians who should be confident, bold, and put to shame those who, in their estimated wisdom, forecast unending trouble; and turn from those who, to serve a class or a community, deny to the length and breadth of this land the prosperity which is its due. Let us abandon sectional causes. No part can be divided from the rest. The prosperity of this land must be reflected to its remotest corners.

"LOOKING at these facts, why should we not go forward again? The storm may not have spent itself, but the worst is over. Why do we hesitate or fear? Why have we the fear that comes from vacillation and dismay? If there were any basic weakness in our economic structure, if we were without resources, if we were weak in our governmental and economic structure and had been thrown into social chaos, then we would indeed be in urgent need of some outside help to lift us out of the morass. But Canada needs no help from others as long as we are all willing and ready to help our fellow citizens.

There is no factor in our domestic situation which we can fairly say is responsible for our present situation, that we are not correcting. And if we have made mistakes regarding which there may be differences of opinion, it would not be fair to discuss them here. But we have lost nothing but confidence in ourselves. We must regain it. We can regain it, if each of us will look at the facts, and recapture the faith without which we cannot prevail."

"WE are told by some that improvement is impossible until world conditions have improved. If our national life and business is to be controlled by others than ourselves, they never will improve. Such driven thought and spirit, whatever prompts it, would drive this country into perpetual bankruptcy.

World conditions will improve. Civilization is hoping and praying for better conditions. But some nation must lead the way. Why should it not be our own Canada?

Review our past achievements. Remembering the many triumphs of our short history. Hold in mind our vast wealth, our sane system of Government, our sound institutions, our unique position in international affairs, our untiring energy, our unity of purpose, our youth, our glorious youth, our youth against the age of other peoples, and march on, secure in the knowledge of better times for those whose faith in themselves has hard times have left unshaken.

"YOU men and women of the university whose teaching and experience have equipped to grapple with the obstacles in the path of our progress, I call upon you to bend your energies to the task and to say to those who would hesitate and turn aside, in the words of a great university president of over a hundred years ago: 'Who gave you courage? Who discharged you from service, until the fight is won?'"

## McGill Yells

The following are the principal yells to be used at the Varsity game.

We're out for gore, we're out for gore, we're out for gore.

Keep her low, keep her low, keep her low, LET HER GO!

M-c-G-I-L-L

What's the matter . . . etc.

Toronto, Toronto, Toronto Varsity!

We'll shout and fight for the blue and white and the honour of U. of T!

Rifferty, rafferty, rafferty rafferty ree!

Toronto, Toronto, Toronto Varsity!

We gotcha, we gotcha, we gotcha Varsity!

We'll shout and fight for the red and white and the honour of M-c-G!

Rifferty, rafferty, rafferty rafferty ree!

We gotcha, we gotcha, we gotcha Varsity!

## CORRESPONDENCE

October 14, 1931

Editor, McGill Daily.

Dear Mr. Editor:

Can you tell me why it is that our debaters, although generally quiet, pleasant men off the platform, seem to become wound up machines and click along like a toy train, when on the platform. Perhaps they are not all like that, and not all the time, but at the smoker on Tuesday I was sorely tempted to get hold of both the President and past President of the Debating Union, knock them over the head, open them up, and watch the wheels go round. I suppose I am prejudiced, but I do not like to have arguments shot at me as if from a gun. If that is the ideal of public speaking at which the Union aims I fear that they will have to struggle

## Stabilizing Power Of Gold Standard Seen In Lecture

(Continued from Page One)

diagrams. A rise of price levels in one country would necessitate a shipment of gold to the other to which it owes. This would make its credit structure topheavy and a reduction of credit would be necessary.

Taking the Bank of England as an example, Dr. Day explained the method employed. The bank rate is raised. Consequently it becomes more costly to get loans and people cut down on loans and expenses. The borrowers offer more tempting terms and all prices go down. Also the creditor country could and should extend credit. Money rates then fall, the creditors commodity prices go up and the required equilibrium is reached.

Lectures to Continue  
In concluding Dr. Day mentioned that this was the essence of the working of the gold standard, but in the recent depression the stabilizing power of the gold standard was not working and the problem was yet to be solved. He would continue the subject in his other lectures.

## S.C.A. Entertains Graduate Members

(Continued from Page One)

graduates might perpetuate the fabric of present life, for the Association must fit men for life's struggle.

The chairman then paid a tribute to George Irving, one of the founders of the Young Men's Christian Association, the forerunner of the present day Students Christian Association. Mr. Irving, at present in New York, was unable to come to the Reunion but sent a message stating his regrets at being unable to do so. Then amid great applause the chairman called on Murray Brooks, well known singer of former days. Mr. Brooks sang a rousing song of the sea, in a manner which showed that his voice had mellowed with age.

Varied Topics

The speakers of the evening were divided into three sections, dealing with affairs long past, recent, and future. Dr. Tees '01, was the first speaker and recalled events of the early days of the Y.M.C.A. He mentioned such names as Percival Molson, and Archie Grace, who gave his life in service for the King. Charlie Hale recalled numerous acquaintances of long ago, and told of the pleasant memories revived by the room in which the banquet was taking place. He asked that the students build better, and so further the success of the Association.

Dr. Adams described the rudimentary condition of the university in his day, and recalled the early struggles of the Association. At that time it had a small membership, consisting mainly of theological students. There were then no proper accommodation for these, and need for a permanent meeting-place was acutely felt. After overcoming the many difficulties in their path, Strathcona Hall was built, as a permanent home for the Y.M.C.A. At the same time Charlie Murray went to Colombo, and helped found a similar Association in Ceylon.

Professor Coote, of the Department of Engineering, Murray Brooks, and Jack Duckworth spoke on the affairs of recent times. Mr. Brooks then spoke on the future of the Students Christian Movement, and stressed the necessity of a more scientific attitude towards religion. He also asked for more emphasis in corporate worship. Judge Howard made the concluding remarks.

## Chemical Industry Club Plans Session

Yesterday's meeting of the Chemical Industry Club boasted a representative, if not a very extensive gathering. This being the first meeting of the year, the election of officers was carried out under the chairmanship of President R. D. Bennett, who was put into office at the end of last season. The result of the elections was as follows—

Vice-president, J. Rankin. Secretary-Treasurer, J. Quigley. Chairman, G. Larocque. Dr. Hibbert was nominated for the position of Honorary President and, although he has not yet been approached on the matter, it is hoped that he will accept the office.

General business was discussed, and it was decided to hold meetings twice a month, on Fridays. One meeting will be for discussion, and one to carry out the purpose of the Club, namely, to visit the plants of local chemical industries.

The next meeting will be held on Friday, October 30, and will be for the visit to Dawes Brewery.

along without my services, which they seem to have done fairly well for the past six years.

Another thing, Mr. Editor, would you ask Mr. Collard why, when he had neatly introduced his remarks with the business about the beginning, middle and end of a speech, proceeded to say "And now to the end" when he really was just getting down to the middle. I don't think it fair to try to deceive the freshmen in this manner.

Yours, etc., Demosthenes.

## Professors Meet Students In Annual Golf Competition

Royal Montreal Golf Club,  
Dixie, Scene of Play To-  
morrow Morning

Intercollegiate Team Will Be  
Chosen On Results Of  
This Match

PROFESSORS may know more than students so far as books are concerned, but when it comes to golf, the students are often wont to show their tutors a thing or two about wielding a putter. Students and professors seldom meet on an equal footing during the course of an academic year, so the annual student-professor golf match is usually featured by heavy entry lists.

In this respect, tomorrow's contest in Dixie will witness no deviation from custom as 54 professors have already signified their intention of participating in this yearly classic. The latter outnumber the students who have been rather slower than usual in handing in their names; last year, the students won the match, and if they don't wake up they may see their hard-won laurels snatched away from them by the professors whose defeat last time still rankles.

Decides Intercollegiate Team. This will be a qualifying round for student representatives for the intercollegiate meet in Kingston on October 23 and 24. The best 12 will be picked according to scores and these will then be weeded down to six. McGill won the golf championship last season, and, judging by the calibre of some of the men entered for tomorrow's event, the title will remain for yet another twelve months.

Each student is required to get in touch with his professor-opponent as early as possible; students are reminded that this is their job and not the professor's. The time of the match is to be agreed upon, and also the manner of reaching the course. If the student has a car, it would be advisable to take as many as it can accommodate. Each team, of one professor and one student, is advised to hook up with another team, as all matches will be four-ball contests.

Method of Scoring. Scoring will be one point for the best ball; and one point for the aggregate score on each hole. Team scoring will be according to the Nassau System: one point for the highest score on the first nine holes; one point for the highest score on the second nine holes; and one point for the match.

One of the highlights of the match is the fact that the professors treat the students, who consequently have to pay no green fees, and get a free lunch on top of that. All players are advised to get off to an early start if they desire to finish in time to see the intercollegiate Trade Meet. The matches will take place at the Royal Montreal Golf Club, in Dixie. The Dr. J. B. Harrington Trophy is awarded yearly to the winning side; last year, the students were victorious, but the professors feel that their turn has come. In the past eleven years, the students have won several times, and one match was tied.

Below are listed the entries: the numbers in the brackets represent the respective seating capacity of each car. Telephone numbers have been listed to remind students to commence arranging the details at once.

Professors	Students
Dr. C. F. Wyde, (2)	James Brodie
Pl. 7461	Wa. 4710
Dr. C. R. Joyce	S. B. Lee

## Royal Vic Racketeers

IT can't be lectures, because girls don't come to college to attend lectures; and it can't be clothes, because the modern college girl has to judge by their non-appearance, a sufficiency of the latter, so these "wins by default" must be attributed to sheer negligence, a negligence which greatly lessens the cheerful competitive spirit of any tournament.

Only Ruth Dow, who is managing, and regretting it, has so far entered the third round, to the everlasting sorrow of M. Seely. The finals of the doubles has already been reached, leaving B. Brookfield and O. Cameron left to oppose W. Chiselm and R. Tait.

Results  
Singles: H. Boyd won from E. Hickey by default; W. Chiselm beat R. Granger, 6-3, 6-0; R. P. Dow defeated M. Seely, 6-3, 6-4.  
Doubles: B. Brookfield and O. Cameron won from A. Painter and K. Morrison by default.

## Harrington Cup Held By Students

THE DR. J. B. HARRINGTON TROPHY, which was presented to the students last Autumn by Dean F. M. G. Johnson. This silverware is offered up for competition every year between teams representing both the professor and student body of the university. The annual match takes place tomorrow morning at the Royal Montreal Golf Club in Dixie.

## SPORT NOTICES

### CONMERCE RUGBY

Will all men intending to play against Law today please turn out half an hour early for signal practice? Bring whatever equipment you can, especially Connerd sweaters.

SUSPENSION FROM ATHLETICS  
D. McLaughlin, Eng. III.  
N. Shinder, Arts IV.

INTERFACULTY FOOTBALL  
Commerce and Law will meet today on the Campus at 4 o'clock. The manager of the winning team must give in a report to the Daily or else the game will go unreported. Each manager must also submit a report to the Athletic Office.

### ENGLISH RUGBY

Practices are held daily at 4.30. The following and all others interested will please turn out: Montgomery, Maycock, Butterfield, Grant, Crasley, Hanbury, Coolican, Wooten, McDonald, Rice, Chalmers, Rabinett, Wilson, Grimes-Graeme, Laurie, R. Grimes-Graeme.

### FENCING

Practices take place Mondays, Wednesdays and Fridays at 5 o'clock in the Montreal High Gym. Coach Raymond will be on hand and equipment will be given out. (17)

### Co-Eds To Hear Shag

Today at 2 o'clock in the R.V.C., the freshmen are to hear Shag Shaughnessy, the McGill football Coach, give a short talk on rugby rules and plays, which promises to be very interesting and illustrative. It will most probably take place in Room 105.

## Student Support Ensures Success Of Senior Squad

Sir Arthur Currie Speaks  
To Players At  
Practice

IS BEHIND TEAM

THERE is no check-rein on the senior football squad this week, as preparation is made for the annual Varsity Invasion. Coach Shaughnessy took advantage of the holiday today to drive the squad through morning and afternoon workouts; the last one lasting till long after the floodlights had been turned on.

Sir Arthur Currie also visited the afternoon practice, and spoke to the players. He told them that he was behind them if they lost just as much as he would be if they won, but that he expected them to go down fighting. The players appreciated Sir Arthur's words, and gave him a fine hand out on the field.

Students Show Interest. It was also obvious yesterday that a great many more student fans were watching the practice. It has been brought out that student support has been lacking, and that if the team can only get some indication of true support games that might be lost will be won. The old days have been recalled when the senior teams used to practice on the Lower Campus before a thousand students.

The senior squad deserve to have the students behind them at this time. Under Coach Shaughnessy's guidance they are driving hard to attain proper condition; something that McGill football teams have not had for some little time. They are practicing many hours every day, eating and sleeping at the Field House and practically living football in an attempt to restore McGill's name in the football field.

Line-ups Uncertain. Many changes are being made and the line-ups are yet very uncertain. At this time it looks as though Doherty, Hammond, and Olker will form the regular half-line, with Krukowski handling the ball at quarter. Doherty or Young will likely direct the plays. There is also a possibility that Regi Newton will find a regular berth at middle wing, to replace Wilson who is out for the season. The outside positions will be shared by Calhoun, Fyfe, Griffiths, and Kirkhoff.

The players are learning football over again in many respects. They are driven down under the kicks; the first man tackles low, and the next piles on high, and hard. Instruction in ball carrying is given just as prominent a place. There will be no balls stolen from the red team this Saturday, if practices count.

Church Practices Kicking. Harry Church was getting a chance in the kicking role too. Church can hold a fifty-yard punt when he does not have the distraction of an opposing line, and perhaps he can get enough practice to remedy this defect so common with kickers. Doherty and Talpis, however, seem to be more reliable in this role. They have had the experience.

This afternoon the seniors will scrimmage against the freshmen team. This will be a real game, and sparks are sure to fly. Coach Shaughnessy insists on hard football being played, if it is to be played at all, and the freshmen are keen to show that they have fight as well as ability. The non-playing freshmen have been asked to turn out

### Track Training Table

The following will sit in at the track training table: Ross, Crabtree, Brown, Edwards, P., Edwards, B., Hart, Sampson, Bourne, Goode, Jacob, Drew, Hutchins, Worrall, Wallace, Painter, Costello, Anderson, Ward, Mackenzie, Howlett, Freedman, Sprenger, McMartin, Lilley, Latham, D., Latham, E., Nobbs, Whitcomb, Lockhead, Dalrymple, Lamb, McGibbon, Lusher, Smith, Goediche, Moore.

## Doctors Defeat Engineers 7 to 1

THE Doctors clashed with the Plumbers, yesterday, in the initial game of interfaculty rugby, and emerged the holders of the long end of a seven to one score, despite the fact that the Plumbers went into the game heart and fist (mostly fist) to prevent it. Both teams were as usual, "out for gore," but neither played as well as last year. This is especially noticeable of Medicine.

Stevens, Medicine's half-back was a great asset to his team in kicking, forward-passing and tricky running. He was ably assisted by "Baldy" Drysdale, stocky, hambone of the team. Morrison and Charlie Battle received Stevens' passes, and both turned in good games, especially the former, who always seemed to be "just there." Engineering have two good men in McBroom and Laurie, half-backs, the former a good kicking-half, the latter a good yard gainer. Dinan of Medicine made a nice gain on a pass from Drysdale, and Coolican and Cross of Engineering both turned in a nice game.

### Medals Used Forward

Medicine had a decided advantage over Engineering in forward-passing, and it is to this that they owe their victory. Medicine chalked up their first point in the opening quarter, on Stevens' kick. In the second frame, Stevens added another point to the sawbones' tally. In the last quarter, he plunged through for a touchdown. A few minutes later McBroom kicked a goal to save the plumbers from a whitewash. McGee tackled the man, who had caught the ball, behind the posts. The game was played under the new interfaculty rules. Evidence of this was seen when the players, complained of being tripped, punched or strangled.

The lineup for Medicine was: MacCrimmon, Eardley, Malinsky, Bates, Loomis, Monson, Minnes, Stevens, Dinan, Drysdale, Balinger, McCormick, Raymond, Elliot and Dow. The engineers lined up as follows: Laurie, McBroom, Kimpton, Seybold, Cross, Sprinkle, Parent, Lockwood, Montgomery, Coolican, Tait, and McGee.

and support their team, and if this is done it will give the football players their first indication of a return of enthusiasm.

The Varsity game here is the biggest event on McGill's sport calendar. A great battle is inevitable, and a capacity crowd assured. It is up to the McGill students to get in there behind the team; if they do they will have reason to be proud of the result.

(Continued on Page Four)

Track Meet Scheduled To  
Start at 1.30 Sharp

Coupon Number 7 Will  
Admit Students

YESTERDAY, candidates for the track team were limbering up their muscles, in preparation for the biggest event of the track season: the 29th Annual Senior Intercollegiate Track Meet, which takes place this year at the Stadium at 1.30 sharp tomorrow afternoon.

As far as the prospects for repeating last year's performance are concerned, McGill's chances are as good as are those of their closest, and most persistent rivals — the Toronto sprinters. Advance notices of the latter indicate that Toronto will be the favorites in the sprints, where their interfaculty times show slight superiority. In the longer distances, particularly the 440, mile, and 880, McGill, with Edwards as a nucleus, is expected to annex valuable points.

Field Events. In the field events, McGill's times and distances compare favorably with those of Toronto. This makes it very difficult to predict the outcome of the events concerned, where competition should be of the keenest.

The student body will be glad to learn that Charlie Drew's indisposition — in the form of a dislocated cartilage — is now a thing of the past, permitting him to do his share in retaining McGill's track title. In the high jump, in which Drew is exceptionally proficient, McGill's hopes are pinned on Worrall, winner of the interfaculty event, since the former's displaced cartilage has kept him from the jumping pit. Worrall is expected, however, to be a match for anything that Toronto or Queen's will produce.

### Events And Entries

Distinguished Canadians Receive Degree Of LL.D.

(Continued from Page One) culty representatives and the honoured guests. Wending its way down the avenue, past the Roddick Gates, along Sherbrooke Street and down Mansfield Street, with the students executing a continuous snake-dance along the route, the procession arrived at Loew's Theatre. The students and University friends filled the capacious theatre as the Chancellor, E. W. Beatty, K.C., LL.D., took charge of the Convocation ceremony.

**Confer Degrees**  
Proceedings commenced with the recitation of prayer by the Rev. Dr. Abbott-Smith, Dean of the Montreal Theological College, affiliated with McGill University, and was followed by the singing of "Hail! Alma Mater," in which the faculty, graduates and student body joined to the accompaniment of the McGill band stationed in the orchestra pit.

The conferring of the honorary degree of Doctor of Laws was next on the program, after which the unveiling of a bronze tablet to the memory of Dean A. W. Thornton, former head of the Faculty of Dentistry, by Professor A. W. McClelland, took place. Dean Chas. W. Martin referred in appropriate words to the achievements of the deceased Dean in making his Faculty pre-eminent among schools of dentistry in America.

**Tablet Unveiled**  
The memorial tablet, which will find a permanent resting place in the Department of Dentistry, bears the following inscription:

In Loving Memory of Alexander W. Thornton, D.D.S., Dean of the Faculty of Dentistry, 1913-1927. "He learned the luxury of doing good."

Following the unveiling of the memorial tablet, Principal Currie introduced the Right Honourable R. B. Bennett who delivered an address, in which he lauded the scholarship of McGill University and reminded the audience of the great role which confronted university-trained men in the solution of the problems of the present universal depression. Stating as his profound conviction that Canada was suffering to a lesser extent from the evils of hard times, than other countries, the Prime Minister urged that we should unite towards its solution and not rest content until we had regained our birthright of national prosperity.

The Special Convocation concluded with the singing of "God Save the King" and a short benediction. After the ceremonies at Loew's Theatre, many graduates and students took advantage of the proximity of Mount Royal Hotel to register at the Reunion headquarters, as well as to secure tickets for the Reunion Dance, which the Graduates' Society is holding to-morrow evening at the Hotel. The Right Honourable R. B. Bennett arrived in Montreal early yesterday morning from New York where he attended the formal opening and dedication of the new Canadian Club. On Tuesday, Premier Bennett was the recipient of the degree of Doctor of Civil Laws from Wesleyan University, Middletown, Conn., on the occasion of the hundredth anniversary of the foundation of that noted New England educational centre.

"Made In Canada" Campaign Scored

(Continued from Page One) mercantile system. What I am trying to point out is the thoughtlessness of buying Campbell's soup when Clark's is the same price."

Margaret Grant, in opposing the "Made in Canada" campaign, pointed out the peculiar and inconvenient divisions of the North American continent, and of Canada itself. Physical features such as the Great Canadian Shield and the Rockies make barriers to trade which cause great expense in transportation of goods which might, but for protective tariffs, be traded north and south.

**Canadian Goods Inferior**  
That Canadian goods are often far inferior to American is another reason against expecting Canadians to trade exclusively in Canada, Margaret Grant pointed out. Only very high protective tariffs will force people to buy Canadian clothes instead of English, French, or American, while Canadian manufacturers make no effort to improve the quality of their products.

The interdependence of all nations of the world now makes nationalism in trade an impossibility. Patriotic feelings may be invoked, but international sentiments and such hatreds within a country as that which exists between Montreal and Toronto seem as deeply felt by all people today.

The two papers provoked lively discussion, during which refreshments were served. Suggestions for the year's program were made, and at the next meeting on Tuesday, November 3rd, Rose Zahalan and Priscilla Pearce will give papers on Marriage and Divorce.

Players' Club

Will the following report at the Players' Club office on Friday at the times given below.  
7.30 p.m. Messrs. Cronyn, Grier, Phil-  
lips, Messrs. Carter, Meagher, Vercoe.

Form Committee To Advise Frosh

(Continued from Page One) this year has been cancelled. Delegates will not be sent from McGill to similar dances in other Universities.  
A budget committee composed of Craig, Parish and Fletcher was appointed to examine the budgets submitted by societies under the Students' Council with a view to paying them as much as possible. The Band, Players' Club and Choral Society budgets were placed under the jurisdiction of this body. The Red and White Revue budget was passed with corrections.

8.00 p.m. Misses Gregory, Garden, Loomis, Miller.  
8.45 p.m. Messrs. Rubin, Stikeman, Harris, Bowen, Pope, Miss Naud.  
9.30 p.m. Messrs. Ignatieff, Beattie.

College Boys Not Hollywood Heroes

High Opinions of University Students Held by Many

NO MASS PRODUCTION

(By Exchange Service).

Is the public justified in looking upon all University boys and girls as rah-rah types? Certainly the students themselves gave such ideas an awful panning, if a random survey of opinions is any criterion. Miss M. Winter, 111 U.C., pointed out convincingly that any ideas with regard to outlandish modes of dress and kittenish behaviour which students might have upon entering University, were entirely dispelled before they entered their second year. The popular conception of some unseen power grinding out mechanical robots which conform to the accepted standards of the present day University student, can't be sound. The campus is fairly swarming with individuality, a thousand latent talents are awaiting the call to the fevered activity of the modern world.

College lads and lasses as pictured in the movies and popular College Humourlies, were pooh-poohed by several lions of the campus. B. L. Anderson, 11 U.C., admitted that they might not be exaggerated in picturing American College life, but that they were certainly exaggerated when applied to Canadian institutions of higher education. "Ridiculous!" tersely ejaculated M. Sheppard IV U.C., but they do hand a good laugh. So evidently, any public-spirited person who expects to take a nice model T.U. of T. graduates into his employ, is sadly misled.

Armory Scene Of Graduates' Smoker Sir Arthur Speaks

(Continued from Page One) tain top, upon which there is first reflected the light of the dawn of the coming day. One of its functions is to review the past, that it may acquire the basis for intelligent prophecy. Its ultimate purpose is to arouse thoughtfulness, to cultivate and expand the minds of its students to the limits of their possibilities for straight thinking. Its primary interest should be in the possible capacity of its men and women to deal with abstractions and to apply these to the solving of problems of our social adjustments in our common complex life. Wherein but in intelligent thinking can the solutions be found which shall restrain individual desire for the public good on the one hand, and protect the talent of the individual from the coercion of the crowd. Wherein but in intelligent thinking are we to determine what constitutes a service to society and what constitutes dis-service?

NOTICES

Notices must be legibly written on one side of the paper only. They must be handed in to the Daily office before eight o'clock on the night previous to publication. For sale notices not accepted.

DELTA SIGMA SOCIETY

There will be a meeting of the Delta Sigma Society executive and the members of the Intercollegiate Debating team today at 1 P.M. in the Common Room of the Arts Building. Subjects for debate will be discussed. (15)

MEDICAL EXAMINATIONS
